What is an APP?

App is the abbreviation for application. An app is a piece of software that can be downloaded to a Smartphone or tablet (WhatsApp is the most popular App in the world).

They are available through distribution platforms operated by the company owners of some mobile operating systems like Android or iO.

The characteristics of our app

The "ICD Granada 2016" App is free.

The "ICD Granada 2016" App will be the method used for receiving all the information, updates, communications and exclusive contents related to the congress.

The "ICD Granada 2016" App will be available for both Android and iO systems.

In order to ensure the correct functioning of the App, you will need the following operating system versions:

- For android, 4.4 KITKAT minimum.
- For iPhone you need the updated version iOS 8.0.

Any systems previous to these versions are not recommended. The operating platforms advise against using older versions to avoid problems.

Practical advice

Download the App as soon as possible.

Browse through the App and familiarise yourself with the contents. Don't worry about doing anything wrong – that's impossible!.

If you have any doubts or you need more information, please contact us.

With this App, you will have all the information and communications always available wherever you are and whenever you need it.

As with most conferences, it is impossible to go to everything as there are many simultaneous presentations and the program is intensive.

We recommend organizing your own personalised congress beforehand: Choose the presentations you think most interesting and prepare your own schedule through the scientific program of the congress. You have all the information available on the App for organizing your own personalized congress agenda according to your criteria.

Make your App operative as soon as you arrive in Granada: we would like to welcome you in a special way.
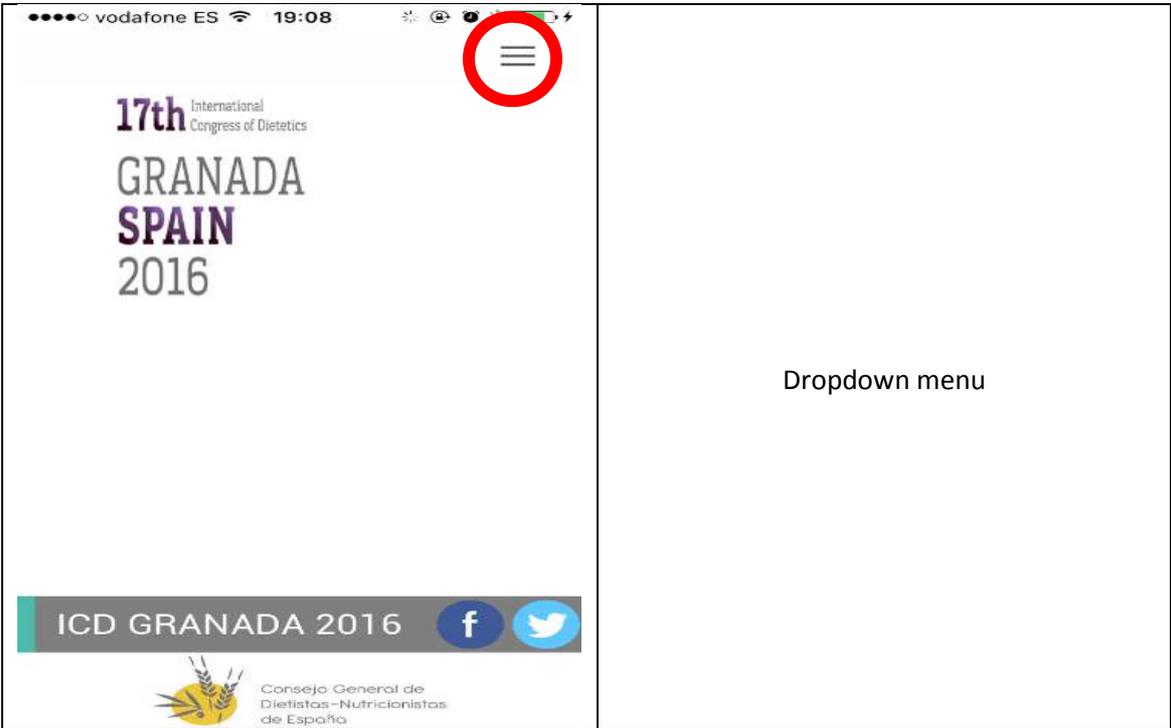

Try to keep the App open, as you do with Whatsapp, so that you will receive all the updates and news related to the congress.

There will be charging points for mobile phones, tablets and laptops at the Congress. However, we also recommend – and would appreciate very much - the use of portable chargers and external power packs.

Do not forget to bring adapters for Spain's power grid. In Spain, voltage is 230 V. The frequency is 50 Hz Plugs and sockets are of type F. In the following images you can see the type of plug and socket:

The ICD Granada 2016 App, step by step
