

Dear presidents and directors of Associations of Dietitians/Nutritionists around the world,

4 years ago I started working on the organization of the XVII International Congress of Dietetics scheduled to be held in the city of Granada on 7, 8 and 9 September 2016.

The conference theme: sustainable eating.

During these years a team of dietitians/nutritionists of the Spanish Foundation of Dietitians-Nutritionists (FEDN) created a working group of young film directors, who are always excited to work on film projects of social interest.

The aim was to make a film to tell the citizens of the world that our way of eating can change the planet and can help people who work at sea, on land, on farms, near where we live.

Today I want to introduce an advance SustainableEating, a film directed by Carlos Sabater Calafat.

My life and the life of the team of people involved in this project has changed. Now, we don't see food in the same way as before.

I would like to invite all dietitians-nutritionists around the world and leaders of the National Dietetic Association (NDA), to attend the premiere of the film will take place on Wednesday, September 7th, 2016, at 10.00 hours, in the Auditorium of the Palace Congress of Granada, within the framework of the XVII International Congress of Dietetics ICD Granada 2016. Once finished the ICD Granada 2016, the film will start a trip to other countries around the world who request to be presented to dietitians-nutritionists members of the National Dietetic Association.

I want to thank the International Confederation of Dietetics Associations (ICDA), the General Council of Dietitians- Nutritionists of Spain and the MAPFRE Foundation, the support in this film project.

SustainableEating is a movie without conflict of interest, a film produced entirely by the Spanish Foundation of Dietitians- Nutritionists with the financial support of the ICDA and the MAPFRE Foundation. This dream has become a reality thanks to the efforts of all them.

Please make [click HERE](#) and see the teaser. Watch a new way of understanding food, nature and human being living on this beautiful planet.

I hope everyone in Granada!

Giuseppe Russolillo Femenías, PhD.
